

St. Francis Memorial Hospital

Picture yourself at SFMH. SMFH is located on the outskirts of Barry's Bay and boasts spectacular views overlooking Kaminisgek Lake. This 27-bed facility serves a catchment population of approximately 10,000. Among the highlights of this well-equipped and up-to-date hospital are:

- a 24/7 Emergency Department (a full-time physician assistant provides additional support to on-call ER physicians);
- technologically advanced diagnostic services such as the PACS system, ultrasound, X-ray, mammography, OBSP, bone densitometry and laboratory;
- capital improvements which are continually on-going such as the new health centre connected to the hospital and nursing station;
- visiting specialists that provide on-site surgical, internal medicine and ENT expertise; access to other specialists can be arranged via the telehealth network (cardiology, dermatology, pediatrics etc.);
- and a strong partnership and shared administration with Renfrew Victoria Hospital which lends additional services and support.

Other on-site clinics and services:

- Alcohol & Drug Assessment Referrals
- Diabetic Counselling
- Nutrition Counselling
- Dialysis
- Echocardiogram
- Foot Care Clinics
- General Surgeon
- Holter Monitor
- Internal Medicine/Pulmonary Function
- Orthotist
- Otolaryngology Clinic
- Physiotherapy Outpatient Clinic
- Respirology/Pulmonary Function Testing
- Sigmoidoscopy
- Surgical Pre-Admission Clinic
