

Is being a Volunteer Patient Family Advisor right for you?

Being a Patient & Family Advisor may be a good match for you if you will:

- Partner with staff to help improve hospital care for others.
- Talk about your experiences as a patient or family member – but also think beyond your own personal experiences.
- Talk about your care experiences and share your thoughts on what went well and how things could have been done differently.
- Work with people who may be different than you.
- Listen to and think about what others say, even when you disagree.
- Bring a positive attitude to discussions.
- Keep any information you may hear as an advisor private and confidential.

Become A Volunteer Patient & Family Advisor

High Quality, Patient Centred Care!

What do Patient & Family Advisors Do?

If you are an advisor for our hospital, you can help us in the following ways:

- Share your story. Advisors help by talking about their healthcare experiences with clinicians, staff, and other patients.
- Participate in committee work. Advisors bring their perspective to the decision-making table.
- Review or help create educational or informational materials.
- Advisors help review or create materials like websites, forms, health information handouts, and discharge instructions.
- Advisors help us make these materials meaningful for all patients and family members to understand and use.
- Work on short-term projects. We sometimes ask advisors to partner with us in making improvements – for example, helping to plan and redesign a patient bathtub room
- Serve on a hospital committee. Members of those committees may include patients, family members of patients, hospital staff and physicians.

What Qualifications are Required?

- You don't need any special qualifications. What's most important is your experience as a patient or family member and your willingness to share your story and ideas in a constructive way.
- All applications will be reviewed by a selection committee in advance of scheduling a short interview. We will provide you with any other training you need.
- Parking tokens will be provided.

What is the Time Commitment?

By becoming a Patient and Family Advisor you are agreeing to a minimum commitment of two years. Meetings are scheduled to last for two hours and are held quarterly, the dates and times decided by the consensus of the members.

Why are Patient & Family Advisors Important?

The Vision of St. Francis Memorial Hospital is: "To be a leader in health services that are patient centred, integrated and responsive to community health needs." As experts in Patient and Family experiences, patients and their families are in the best position to provide recommendations on improving the planning, delivery and evaluation of care services within the framework of Patient and Family Centred Care.

Testimonial PFAC Member

"I see first-hand how dedicated and focused the administration and the managers of the hospital departments are as they continually look for better ways to do things – better for the hospital, better for the staff and ultimately better for the patients."

Why Should you become a Patient and Family Advisor?

When you or your family member were in the hospital, did you think there were things we could have done better?

Do you have ideas about how to make sure other patients and families get the best care possible?

At St. Francis Memorial Hospital, Patient and Family Advisors give us feedback and ideas to help us improve the quality and safety of care we provide.
